## Skills

---

**Languages:** C/C++, C#, JavaScript, TypeScript, Python, SQL

**Technologies & Tools:** Angular, ReactJS, .NET Core, MongoDB, MySQL, Docker, Webpack, Git & GitHub

## Work Experience

---

**Selise Digital Platforms, Dhaka, Bangladesh**

Feb 2022 - Present

### *Software Engineer*

- Spearheaded crucial contributions to three enterprise-level projects, showcasing expertise in developing innovative features and resolving complex issues as a dynamic front-end developer.
- Currently driving advancements in a cutting-edge Content Management System (CMS) through strategic front-end development initiatives. Specializing in the implementation of HTML, CSS, Angular, and TypeScript to deliver a seamless user experience.
- Proactively implementing new features and modules to meet project requirements, while adeptly handling API integrations and executing essential CRUD operations from the front-end perspective.
- Upholding the highest coding standards and ensuring adherence to organizational rules and regulations through meticulous PR reviews. Instrumental in maintaining a uniform and high-quality codebase.
- Integral team player in a fast-paced, deadline-driven environment, collaborating effectively with cross-functional teams in Agile methodology. Consistently delivering top-tier results and exceeding project expectations.
- Proficient in HTML, CSS, TypeScript, and Angular, with hands-on experience in Agile methodologies, GitHub, and Jira. Demonstrated ability to adapt quickly to emerging technologies and industry best practices.

**Toph, CodeMarshal**

Sept 2019 - Mar 2021

### *Problem Setter & Judge*

- Authored 10+ standard programming contest problems.
- Worked in the judging panel in 5+ programming contests.

## Education

---

**Daffodil International University**

B.Sc. in Computer Science and Engineering

Sep 2017 - Aug 2021

**CGPA: 3.58 out of 4.00**

## Project Work

---

- **Personal Website:** [www.shameemalam.com](http://www.shameemalam.com) (for additional information and projects)
- **SV Omega (2023-2024):** Successfully led the development of a responsive microsite for a restaurant, demonstrating proficiency in creating complex, user-friendly web solutions. Specialized in role management, ensuring seamless and efficient operation. Implemented a robust user management module catering to diverse user profiles, showcasing expertise in developing scalable and secure functionalities to enhance overall system performance.
- **EwoPharma (2023):** Contributed to the development of the performance manager module for employees at EwoPharma. Introduced a comprehensive performance evaluation system resulting in a 25% improvement in employee performance and productivity.

## Contest Programming

---

- Participated more than 150 online and onsite contests
- Solved 1800+ algorithmic and data structures problem in various online judges.
- Worked as trainer in several semester-long training camps, conducted 30+ Algorithm and Data Structure classes and mentored several individuals.
