Skills

Languages: JavaScript, TypeScript, C#, C/C++

Frontend: React, Redux, Tailwind CSS, Shadcn, TanStack Query

Backend: ASP .NET Core, Rest API, Minimal Api, MongoDB, xUnit

Practices & Tools: Agile/Kanban, SDLC, OOP, TDD, SOLID, DRY, KISS, YAGNI, TDD, Git, GitHub

Work Experience

Selise Digital Platforms, Dhaka, Bangladesh

Feb 2022 - Present

Senior Software Engineer

Apr 2025 - Present

- Collaborating with cross-functional teams to design and implement a scalable Data Gateway, enabling developers to self-serve data sources and schemas, reducing onboarding time by 30%.
- Maintaining and enhancing reusable modules (Email Template, Localization, Release Notes) leveraged by 20+ projects, improving stability and addressing feature requests.
- Mentored and onboarded 4+ junior engineers, accelerating their productivity and reducing ramp-up time from 3 months to 8 weeks.

Software Engineer

Feb 2022 - Mar 2025

- Migrated APIs from GraphQL to REST, boosting performance and scalability for 50,000+ users.
- Built a Human Resources Directory (performance, leave, idea submissions), driving 20% higher employee satisfaction.
- Delivered 4+ large-scale projects in Agile teams using Angular, ASP.NET Core, React, and GitHub, consistently meeting sprint goals.

Project Works

- **Selise Blocks App (2024 – Present)**
 - Reduced critical bugs by 60% after onboarding, boosting customer satisfaction.
 - Enhanced Language Manager to export data and bulk-delete keys, reducing manual management time by 70%.
- **Selise Blocks Cloud (2025 – Present)**
 - Engineered core frontend modules (Data Gateway, Localization) in React and Next.js, covering 80% of planned features.
 - Collaborating with 10+ team members (UX, backend, business) to drive quality delivery.
- **Swiss Leaders Platform (2024)**
 - Migrated APIs from GraphQL to REST and added pagination, reducing query times for 50,000+ users.
 - Redesigned payment workflow in invoice and service modules, cutting steps by 50% and improving usability.
- **EwoPharma HR Module (2023)**
 - Developed HR modules for employee attendance, leave management, now used by 400+ employees.
 - Implemented a forecasting module replacing Excel, reducing errors by 80% and speeding up profit projections.

Competitive Programming & Problem Setting

- Solved 1,800+ algorithmic problems across online judges, participated in 150+ contests.
- Conducted 30+ algorithm & data structure lectures, mentored 50+ students in training camps.
- Served on 5+ contest judging panels, ensuring fairness & plagiarism detection.

Education

Daffodil International University

Sep 2017 - Aug 2021

B.Sc. in Computer Science and Engineering
